Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

Art Unit: 1743

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-8 and 11-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims (1-16 and 27-30); (22-38 and 57-58) of U.S. Patent No. 6,327,410; 6,023,540 respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are directed to compositions of microspheres/beads immunologically active and label with markers such as fluorescent dyes .

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in–

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

Art Unit: 1743

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1-8 and 11-18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Walt(USP 4,822,747) or Walt(USP 5,143,853).

The cited art teaches analytical chemistry systems comprising a population of beads encoded with fluorescent dyes.

Claims 1-8 and 11-18 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Walt et al.(USP 5,814,524).

The cited art teaches analytical chemistry systems comprising a population of beads encoded with fluorescent dyes.

Claims 1-8 and 11-18 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Ryan et al.

Ryan et al. teach a population of small particles (0.5-0.7 mm) carrying a fluorescent chemical functionality that facilitates identification of the particle which has been read on the claimed analytical system containing a population of beads carrying a chemical signature. Ryan et al. teach use of at least 2 different fluorescent indicators which has been read on the claimed encoding by controlling the ratio of at least 2 dyes.

Claims 1-8 and 11-18 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Anderson et al.(USP 5,677,187).

Anderson et al. teach use of at least two rare earth elements impregnated in a polymer bead to create a unique tag for subsequent identification.
